

JOB ADVERTISEMENT NOVEMBER 2021

Your choice: amount of work / office or home office / office: Essen, Stuttgart or at home

**CFCS-Consult GmbH** is a service provider with main office in Essen (North Rhine Westfalia) and a branch office in Stuttgart (Baden-Württemberg).

We advise industrial clients on regulatory issues relating to industrial chemicals (REACH), biocides and cosmetics. Our team comprises experienced staff with qualifications in toxicology and ecotoxicology, chemistry and environmental chemistry, biology and biochemistry.

### **Our areas of activity:**

We support our clients in all questions related to the preparation of registration dossiers. We search and evaluate scientific data and documents for the registration, evaluation or authorisation of chemical substances and mixtures. We plan and supervise toxicological and ecotoxicological studies. We support our clients in project planning, project management and communication with other registrants or with authorities. We prepare dossiers, ensure smooth processes for registrations and authorisations and see ourselves as responsible for the legal conformity of biocidal products.

**We are looking for** the next possible date for our office in Essen (if desired also Stuttgart) or also predominantly home office:

### **Regulatory Toxicologist (m/w/d) for REACH and Biocidal Products Regulation**

#### Your benefits at CFCS:

- High flexibility: free arrangement of working hours and presence (office and/or home office)
- fast decisions, flat hierarchy and constant support from colleagues
- understanding interaction and consideration for the needs of families
- variety of tasks and challenging work (besides routines of course)
- a permanent contract
- attractive fixed salary incl. Christmas bonus, and profit sharing after on-the-job training
- support in continuing education/training

#### Your future field of activity:

- You will be involved in the preparation of dossiers (registration, authorisation) and study summaries.
- You search for study data and literature and evaluate them with regard to their suitability (relevance, reliability) for the respective regulatory area.

- You evaluate toxicological study results
- You monitor ongoing studies and communicate with laboratories
- You familiarise yourself with regulations (e.g. Reach, biocides, cosmetics, CLP) and apply them for the customer.

What you bring with you (ideally)  
or you will soon be able to:

- in addition to a scientific academic degree in a natural science subject (biology, chemistry or comparable), preferably with a doctorate
- ideally also with additional training as a specialist toxicologist
- Experience in the fields of toxicology, ecotoxicology, risk assessment, also for cosmetics, preferably also knowledge of the approval of medical products or medicinal products
- Experience with REACH, CLP and authorisations under the Biocidal Products Regulation are particularly relevant
- Team spirit, social competence, and willingness to perform
- Basic IT skills
- Experience with IUCLID6, QSAR tools would be very welcome
- Knowledge of German and English, other foreign languages are an advantage
- experience with other regulations such as drinking water, fertiliser or food regulations is also of interest.

Your colleagues will provide you with comprehensive support during the induction process.

We offer you a performance-related and pleasant environment with direct and uncomplicated communication. We look forward to receiving your application and getting to know you personally.

Please send your documents preferably by mail to:
