

Nico Adler graduated with a Diploma in Biology at the Technische Universität Braunschweig in Germany. Here, his core modules were Ecology, Botany as well as Organizational and Occupational Psychology. In 1998, he was awarded a Master of Science in Environmental Protection and Management at the Scottish Agricultural College (now SRUC) of the University of Edinburgh (UK).

He gained experience in the field of freshwater monitoring at the Institute of Freshwater Ecology (now CEH, part of the Natural Environment Research Council (NERC, UK), at the German Agency for technical cooperation (now GIZ) in Frankfurt, Germany where he assisted in auditing and the preparation of an Environmental Report, at the German Development Service (now GIZ) in the Dominican Republic where he was involved in a Project at the water authority INDRHI for the implementation of a national programme for biological freshwater monitoring based on identification of indicator organisms, at the North Rhine-Westphalia State Environment Agency, Germany (now LANUV) where he participated in the R&D project of the Federal environment agency on the implementation of and reporting for the EU-Water Framework Directive. At last, he was project manager at URS Corporation, Germany (now part of AECOM) within the department of Environmental Due Diligence with main responsibilities in environmental compliance auditing, reporting and modelling of provisions for contingent liabilities and contingent assets (IAS 37) within the scope of mergers and acquisitions (M&A).
